

AMENDMENT TO THE CLAIMS

The following listing of claims will replace all prior versions, and listing of claims in the application:

LISTING OF CLAIMS

1. (Currently amended) A hand tool comprising:

a driving end;

a handle having a first end to which the driving end is connected, the handle including two opposite wide surfaces and two opposite narrow sides, the wide surfaces being adapted to be perpendicular to a rotational direction of the handle, a reinforcement protrusion extending perpendicularly from each of the wide surfaces and located close to the first end of the handle, each reinforcement protrusion including a thumb area which is inclined to the wide surface corresponding thereto.

2 (Original). The hand tool as claimed in claim 1, wherein the wide surfaces are adapted to be perpendicular to a plane where the driving end lies on.

3. (Cancelled) The hand tool as claimed in claim 1, wherein a reinforcement protrusion extends perpendicularly from each of the wide surfaces and is located close to the first end of the handle.

4. (Cancelled) The hand tool as claimed in claim 3, wherein each reinforcement protrusion includes a thumb area which is inclined to the wide surface corresponding thereto.

5. (Currently Amended) The hand tool as claimed in claim 1, wherein the first end of the handle has an insertion with a first hole defined therethrough, [[the driving end]] the insertion pivotably connected between [[the]] two lugs on the driving end by extending a pin through [[the]]two respective second holes in the two lugs and the first hole in the insertion.
